USER MANUAL

LOGIN FORM

The image shows a login form window titled "frmLogin". The window has a standard Windows-style title bar with minimize, maximize, and close buttons. Inside the window, on the left, is a dashed rectangular box containing a blue silhouette of a person and a red circular button with a white right-pointing arrow. To the right of this box are two text input fields. The first field is labeled "Email" and the second is labeled "Password". Below these fields is a large button labeled "Login".

Login

Here is where you enter your login credentials, including your email and password, to access your account. If the credentials entered are incorrect, you will be unable to log in.

HOME PAGE

The home page that people view when they visit the system. It serves as a primary hub, presenting an overview of the platform's features and leading users to various areas or tasks. It includes order items, backup information, and customer review information. The home page's objective is to provide a pleasant initial impression, assist users in understanding the platform's features, and direct them to explore more or take certain actions.

Order Items/ Export Orders

Here is where the list of products will be shown. Order Items this feature allows users to view and manage individual order items. Users can extract or download order-related data from the system. This data often comprises customer information, order numbers, item descriptions, price, and order statuses, as well as information about the orders placed.

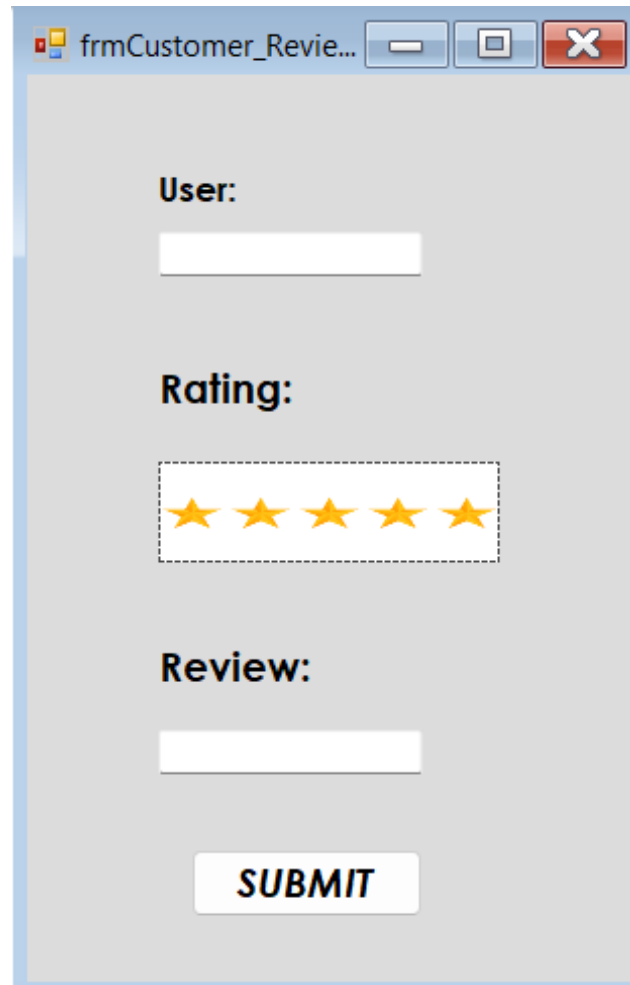

Import and Back Up

The import feature allows users to bring data or files from csv files into the system. It allows information, such as list of products to be transferred in the system for subsequent usage. By reducing the need to manually enter or replace information, data import can save time and effort.

Producing a copy or duplicate of a database to safeguard it from potential data loss or corruption is referred to as backup database. It entails creating a backup of the complete database, including all its tables, records, and relationships, and storing it in a secure location. This backup copy can be used to restore the database to its prior condition in the event of inadvertent deletions, system failures, or other unforeseen events.

Customer Review

A screenshot of a software window titled "Customer Review". The window has a standard Windows-style title bar with a minimize button, a maximize button, and a close button. The main content area is light gray and contains three labeled input fields: "User:" with a text box, "Rating:" with a star rating widget showing five yellow stars, and "Review:" with a text box. At the bottom center is a white button with the text "SUBMIT" in bold, italicized, black capital letters.

Users can offer their views, ideas, and experiences regarding a product, using the customer review option. It gives customers a place to voice their happiness, criticism, or recommendations for change. Often write reviews by offering a rating (such as a star rating) as well as entering a remark or review text.
